SERMA Safety and Security:
first laboratory accredited EUCC by ANSSI.

Bordeaux, 3 April 2025 - SERMA Safety and Security has become the first laboratory to be accredited under the EUCC scheme by ANSSI (Agence Nationale de la Sécurité des Systèmes d'Information, the French National Cybersecurity Agency). This strategic recognition allows SERMA to assess hardware and software products under the new European Union Common Criteria (EUCC) security framework, contributing to the harmonization and digital sovereignty of Europe.

SERMA Safety and Security: The First Laboratory to Conduct EUCC Evaluations Leading to Europe's First Certifications

SERMA Safety & Security is the first laboratory to have conducted security evaluations leading to the issuance of the first EUCC certificates in Europe. Issued by ANSSI, these certificates, valid for five years, mark a key milestone in the European recognition of cybersecurity solutions.

Ranked among the top 5 security laboratories worldwide and the second-best globally for Common Criteria evaluations, SERMA takes a new step forward with its EUCC accreditation.

With this accreditation, SERMA is now authorized to assess:

- Critical equipment embedded in sensitive infrastructures (energy, transport, telecommunications),
- Cybersecurity solutions for industries and institutions.

Official Announcement at the 2025 European Cybersecurity Certification Conference

The announcement was made on March 13, 2025, during the European Cybersecurity Certification Conference in Warsaw. Supported by the European Commission and the Polish presidency, this event brought together leading experts and decision-makers in the certification sector.

As cyber threats continue to rise, the European Union has introduced the EUCC scheme to harmonize cybersecurity certification requirements.

With this accreditation, SERMA Safety & Security establishes itself as a key player in this transition toward a unified and strengthened European cybersecurity framework.

ABOUT SERMA SAFETY AND SECURITY

SERMA Safety and Security supports its customers in the safety and cyber security of IoT, embedded, industrial and information products and systems. The company's unique expertise enables it to intervene across the entire value chain: from IoT products through network and system infrastructure to internal and external applications.

SERMA Safety and Security is recognised for its technical excellence, which has earned it numerous qualifications and certifications, including CESTI, PASSI RGS, PASSI LPM, SESIP, FIPS, SBMP, etc.

Founded in 1998, SERMA Safety and Security's security laboratory is recognised for its cutting-edge expertise. It is one of a select group of CESTI (Centre d'Évaluation de la Sécurité des Technologies de l'Information) accredited laboratories, and carries out government-certified assessments, in particular via Common Criteria and First Level Security Certification.

In addition to these activities, the company offers training across its entire range of expertise in operational safety and cyber security. With a presence at 9 sites in France, the company employs over 230 people and will achieve sales of more than €30 million in 2024. It is a subsidiary of the SERMA Group.

ABOUT THE SERMA GROUP

As an independent French expert, the SERMA Group stands out for its expertise in the design, security and reliability of products and data.

Our expertise, consultancy and testing services are aimed at sectors subject to severe environmental, reliability and safety constraints (aeronautics, space, defence, automotive, rail, medical, banking, etc.).

Thanks to its culture of technical excellence and its network of experts, SERMA is involved throughout the product life cycle, from the R&D and design phases through to maintenance in operational conditions.

The SERMA Group offers a comprehensive range of services covering the following business areas

- Energy
- Electronics and materials technologies
- Cybersecurity and safety
- Engineering
- Microelectronics
- Telecommunications

With 1400 employees at 30 sites in Europe, Tunisia and the United States, the SERMA Group generates sales of €190 million.
