THE CRA

(CYBER RESILIENCE ACT)

Secure your products, control your risks

100% CRA-compliant approach

Tailored support, from training to CE marking

Dedicated CRA experts

30 years of expertise in security and CRA compliance

SERMA
SAFETY & SECURITY

OUR SUPPORT

Training & Awareness:

Objective: Strengthen cybersecurity skills and culture within your teams.
Detailed catalog available upon request.

Audit & maturity workshops, regulatory and legal support:

Objective: Identify your obligations, assess your cybersecurity maturity, initiate compliance from the earliest stages, and establish a structured action plan to support your progress.

Product risk analysis:

Objective: Conduct the comprehensive risk analysis required under the CRA, covering the entire product lifecycle, with traceability to security and CE compliance requirements.

Governance & SBOM / Technical cybersecurity:

Objective: Define and implement a secure product lifecycle, driven by risk analysis results, with appropriate tools at each stage.

Penetration testing (Pentests):

Objective: Validate product robustness under real-world conditions, in line with its classification and applicable regulatory requirements.

CE marking & product compliance:

Objective: Support you through to CE marking certification and the EU Declaration of Conformity.

Post-market surveillance and vulnerability management:

Objective: Establish an effective PSIRT and manage vulnerabilities after product release.
